In case, during the process of a particular tender, the user loses his digital certificate (due to virus attack, hardware problem, operating system or any other problem) he will not be able to submit the bid online. Hence, the users are advised **to keep a backup of the certificate** and also keep the copies at safe place under proper security (for its use in case of emergencies).

In case of online tendering, if the digital certificate issued to the authorized user of a firm is used for signing and submitting a bid, it will be considered equivalent to a no-objection certificate/power of attorney /lawful authorization to that User. The firm has to authorize a specific individual through an authorization certificate signed by all partners to use the digital certificate as per Indian Information Technology Act 2000. Unless the certificates are revoked, it will be assumed to represent adequate authority of the user to bid on behalf of the firm in the department tenders as per Information Technology Act 2000. The digital signature of this authorized user will be binding on the firm.

In case of any change in the authorization, it shall be the responsibility of management / partners of the firm to inform the certifying authority about the change and to obtain the digital signatures of the new person / user on behalf of the firm / company. The procedure for application of a digital certificate however will remain the same for the new user.

The same procedure holds true for the authorized users in a private/Public limited company. In this case, the authorization certificate will have to be signed by the directors of the company.

a. Mustard Seed Cleaning :

Mustard Seed is cleaned through Jharna. Its sieve of various mesh-sizes is 120, 100, 76 per square inch surface area, which is used to segregate foreign matter such as stone, crushed brick particles, glass particles, sand, metal scrap whereas the dust catcher cyclone sucks fine grain foreign matter which is suspected to be present in the mustard seed sacks.

b. Semi Crushing :

Approx. 20 to 25 Kg of cleaned Mustard Seed is fed at a time into Kohlus through overhead conveyor and set to rotate for 50 to 60 minutes duration by mixing $\frac{1}{2}$ to $1\frac{1}{2}$ tr of water depending upon moisture content of the seed. The seed is crushed in Kohlus with the help of latt in wooden chamber. Mustard Oil is collected in crude oil tank through drain channel. As a result of semi crushing , 55-60% mustard oil is extracted from mustard seed and residual cake is taken out from Kohlu and is fed into expeller through conveyor and elevator.

c. Crushing in Expeller :

The residual mustard cake from Kolhu (Ghani) is fed into expeller. The oil is extracted by pressing of cakes through worms. The residual cake from first expeller is further fed into second expeller through elevator. The jacket steam is passed into expeller kettle to softer the cake and facilitates extraction of mustard oil. The residual cake fed into third and fourth expeller as per procedure adopted in first and second expeller. The oil is extracted by pressing of cakes through worms. The final cake is transported to cake godown through conveyor and elevator. The mustard Oil from all expeller are collected in crude oil tank through oil drain channel approximate 35-40% mustard oil is expected from the seed.

d. Filtration :

- **Initial filtration:** The crude oil is lifted by the pump form crude oil tank and fed into the first filter press. The filter press has 30 plates containing filter cloth. Mustard Oil is passed through filter cloth. The sediments remain in frames of filter press -1 and oil is collected filter oil tank -1. The deposit sediments in the frame of filter press are cleared once in a day reproduced into the expellers along with kohlu cake.

- **Final filtration :** Mustard Oil from crude oil tank -1 is fed second filter press. It has only 30 plates containing filter cloth. Oil is passed through filter cloth the sediments remain in the frames of filter press and oil is collected in second filtered oil tank (FOT). Mustard oil from FOT-2 is transferred to mother tank (40 MT). The deposited sediments in the frames of filter press are cleaned once in a day reproduced in to the expellers along with kohlu cake.

e) Packing :

Packing of Mustard Oil : $\frac{1}{2}$ Ltr, 1 Ltr, 5 Ltr, Tin & Jar, 15 Ltr./Kg Tins & Jar

Packing of Refined Soyabean Oil : 1 Ltr. Pouch, 5 Ltr. Tin, 15 Ltr./Kg Tins & Jar
